

# 2017 Subject Index

15q deletion .....	380	Clinical presentation .....	194
17-hydroxylase deficiency .....	163	Complication .....	293
46,XY disorder of sex development.....	163	Congenital .....	278
46,XY disorder of sex development.....	85	Congenital adrenal hyperplasia.....	1, 85
Acrodysostosis .....	360	Congenital hyperinsulinism .....	194
ADAMTS-1 .....	24	Congenital hypothyroidism.....	106
Adiponectin .....	202	Cornelia de Lange syndrome .....	366
Adolescence .....	237	Cortisol.....	237, 344
Adolescent.....	132, 375	Cut-offs.....	17
Adolescents .....	39, 58, 246, 253, 265, 329	Diabetes .....	52, 388
Albright hereditary osteodystrophy.....	74	Diabetes eating problem survey-revised .....	323
Alkaline phosphatase.....	63	Diabetes insipidus .....	283
Amino-terminal propeptide of C-type natriuretic peptide .....	308	Diabetes mellitus.....	283
Anastrozole .....	168	Diabetic ketoacidosis.....	118, 283
Anthropometry.....	329	Diagnose .....	163
Anti-glutamic acid decarboxylase .....	388	Disordered eating attitude .....	237
Anti-Müllerian hormone receptor mutation .....	179	Distributed eating behaviors.....	323
Anti-Müllerian hormone receptor resistance .....	179	Duplication 4q.....	380
Apoplexy .....	265	Dyslipidemia .....	144
Biomarker .....	308	Ectopic ossification.....	74
Blood glucose .....	156	Endocrine diseases.....	48
Body mass index.....	111, 337	Euthyroid .....	337
Bone marker .....	106	Fat mass.....	124
Bone mineral density .....	237	Fetuin-a .....	293
Bone turnover .....	237	FGFR1 mutations.....	95
Brachydactyly .....	360	Fine-needle aspiration biopsy .....	222
BRAF mutation .....	185	Frame size.....	329
C-type natriuretic peptide.....	308	Frequency .....	58
Cardiomyopathy.....	52	Frozen section.....	222
Carotid intima-media thickness .....	144	GAMLSS method.....	39
Cerebral cavernous malformation.....	355	GCK-MODY .....	246
Characteristics .....	58	Gene mutation.....	194
Child.....	118	Gene polymorphisms .....	138
Child obesity .....	124	Genetic syndromes.....	91
Childhood.....	31, 91, 144	Genetic testing .....	80
Childhood obesity .....	8	Genotype.....	246
Children.....	39, 58, 132, 185, 246, 288, 329, 337, 344	Glucokinase .....	355
Children and adolescent.....	111, 323	Glucokinase-Maturity-Onset Diabetes of the Young.....	246
Cinacalcet.....	172	Glutathione S-transferase T1 and M1 .....	138
Clinical decision making.....	208	Glycemic control .....	253

# 2017 Subject Index

Glycemic variability .....	202	Kallmann syndrome .....	95
<i>GNAS</i> gene .....	74	Kisspeptin .....	101
Growth .....	208, 308	Large-cell calcifying Sertoli cell tumor.....	168
Growth hormone .....	366	Limbic encephalitis .....	388
Growth hormone deficiency .....	208	Lipodystrophy .....	52
Growth hormone receptor .....	380	Magnetic resonance imaging.....	265
Growth hormone therapy .....	208, 380	Malignancy-related hypercalcemia.....	315
Growth percentiles .....	329	Maturity-onset diabetes .....	355
Gs $\alpha$ activity .....	74	Melanocortin-4 receptor .....	216
Headache .....	265	Menarcheal age .....	156
Heart-type fatty acid binding protein.....	118	Metabolic syndrome .....	202
Height .....	39	Multiple endocrine neoplasia 1 .....	375
Hereditary vitamin D-resistant rickets.....	172	Mutation.....	216
High-fat diet .....	300	Neck circumference.....	17
Hirsutism.....	1	Neonatal diabetes.....	260, 274
<i>HSD3B2</i> gene.....	70	Neonate.....	194
<i>HSD3<math>\beta</math></i> gene.....	85	Neurokinin B .....	101
Hypercalcemia .....	315	<i>NIPBL</i> .....	366
Hyperglycemia .....	355	Non-alcoholic fatty liver disease .....	293
Hyperinsulinism .....	375	Non-classical congenital adrenal hyperplasia.....	1
Hyperparathyroidism .....	315	Noncommunicable disease.....	156
Hyperprolactinemia.....	350	Nonsense mutation .....	260
Hypertension.....	344	Nutrient transport.....	300
Hypertriglyceridemia.....	52	Nutritional rickets.....	63
Hypoglycemia .....	375	Obesity....	17, 31, 111, 216, 237, 300, 308, 337, 344
Hypogonadotropic hypogonadism.....	95	Otitis media with effusion .....	48
Hyponatremia .....	288	Ovarian cyst .....	58
Hypophosphatasia.....	229	Overweight.....	111, 308
Hypothyroidism .....	278, 337	Oxoglutarate dehydrogenase .....	355
Idiopathic infantile hypercalcemia.....	315	Oxytocin .....	124
Inactivating parathyroid hormone/parathyroid hormone related protein signalling disorder .....	360	Pancreatic agenesis .....	274
Initial doses .....	132	Panhypopituitarism .....	265
<i>INSR</i> .....	371	Papillary carcinoma.....	222
Insulin resistance.....	31, 371	Papillary thyroid cancer.....	185
Insulin-like growth factor-1.....	208	Parents .....	111
Insulinoma .....	375	Pathophysiology .....	344
Intellectual disability.....	355	Pediatric .....	337
Interleukin-6.....	202	Pediatric thyroid cancer.....	185
Intrauterine growth .....	300	Pediatrics.....	315
Irisin.....	124	Perceived expressed emotion .....	253
		Percentile .....	39

# 2017 Subject Index

Percentiles .....	17	Stress .....	237
Peutz-Jeghers syndrome .....	168	Subclinical hypothyroidism .....	144, 350
Phenotype .....	246	Syndrome of inappropriate antidiuretic hormone secretion .....	288
Phosphodiesterase 4D .....	360	Testicular adrenal rest tumor .....	85
Pituitary abscess.....	265	Thyroid hormones.....	8
Pituitary adenoma.....	265	Thyroid nodule .....	222
Placenta .....	300	Thyroid stimulating hormone .....	337, 350
Polycystic ovary syndrome .....	24	Thyroidectomy .....	222
Potassium.....	163	Thyrotropin deficiency .....	278
Precocious puberty.....	101	Thyroxin.....	106
Prepubertal gynecomastia .....	168	Tight junctions.....	31
Preschool children.....	17	Tolvaptan.....	288
Prolactin.....	350	Treatment.....	283
Proprotein convertase 1/3 deficiency.....	283	Turkish children.....	229
Pseudohypoparathyroidism Ia .....	74	Tympanometry.....	48
<i>PTF1A</i> gene .....	274	Type 1 diabetes mellitus....	132, 138, 253, 293, 323
Puberty .....	185	Undescended testis .....	179
Rabson-Mendenhall syndrome .....	371	Uniparental isodisomy.....	70
Reduced penetrance.....	95	Versican.....	24
Regular insulin .....	132	Virilization .....	1
Reproductive age.....	156	Vitamin D.....	63
Rickets .....	150	Vitamin D deficiency .....	150
Secondary hyperparathyroidism.....	172	Waist-height ratio .....	8
Short stature.....	74, 91, 380	Weight.....	39
Skeletal dysplasia .....	360	<i>WFS1</i> gene .....	80
Small for gestational age .....	366	Whole-exome sequencing .....	366
Solid pseudopapillary tumor.....	375	Wolfram syndrome.....	80
Splicing .....	260	Wrist circumferences.....	329
Steroid 3 $\beta$ -HSD2 deficiency .....	70	Zonulin .....	31
Stoss therapy .....	63, 150
